Permit for : GNS Science, Stable Isotope Laboratory
30 Gracefield Road
Gracefield
Lower Hutt 5010
New Zealand
Attention : Andrew Phillips
Phone: 04 570 4620
Fax: 04 570 4657

Permit No : 2011043905
Replaces Permit No : 2010040872
Expiry Date : 15 Sep 2012
No of Consignments : Multiple
Import Purpose : Laboratory Use

Establishment No :

Client Refs : PRQ54591

Exporter Name : Various

Country of Origin : All Countries

Type of Material	Commodity Description	Quantity	Measure
Plant Material	Dried plant material (leaves, stems, roots, algae tree cores) for isotope analysis.	Unlimited	Units
Soil	Soil, sediment and rock samples for isotope analysis.	Unlimited	Units
Various	Mineral and gas samples for isotope analysis.	Unlimited	Units
Water	Water and ice samples for isotope analysis.	Unlimited	Units

Post Entry Type : Transitional Fac

Standard Reference : BNZ-STD-TFGEN (General Transitional Facilities for Uncleared Goods)

Transitional Facility : Stable Isotope Laboratory
 P O Box 31 312
 Lower Hutt
 Wellington
 Institute of Geological & Nuclear
 Sciences, 30 Gracefield Road,
 Lower Hutt

Operator : Andrew Phillips
Inspector : Nitya Sharma

Ref : 3359

Special Conditions :

1. On arrival any plant material is to be inspected for pests and diseases by an officer of MAF Biosecurity New Zealand.

2. The quantity of individual samples imported under this permit may be up to 1 kg.

GENERAL CONDITIONS

1. All samples must be labelled. On arrival in New Zealand all documents associated with the consignment will be inspected by a MAFBNZ inspector.

2. The samples are to be consigned in secure packaging.

3. The samples are to be stored and used at the transitional facility in accordance with a quality operating system approved by the inspector of the listed transitional facility, and must not leave the facility without further authorisation from the facility inspector.

4. Any material remaining after analysis is to be incinerated/autoclaved for disposal, unless otherwise stated in the operating system with further authorisation from the facility inspector.

5. A record is to be kept by the importer of all samples introduced under this permit (including scientific name/description, country of origin, date of arrival) and the current status of the material (i.e. held/in use/destroyed). This record is to be made available to a MAFBNZ inspector at all reasonable times.

6. If any conditions of this permit to import cannot be or are not complied with the importer may be required by a MAFBNZ inspector to reshipe or destroy the plant material.

IMPORTANT INFORMATION FOR PERMIT HOLDERS AND AGENTS

- 1 This permit, and compliance with the provisions of the specific import health standard(s) and/or entry conditions, does not guarantee that the goods you import will be given a biosecurity clearance. There are other restrictions in the Biosecurity Act 1993 which apply to the giving of biosecurity clearance.
- 2 You need to ensure that the goods you import comply with the provisions of the specific import health standard(s) and/or entry conditions. The import health standard may be amended during the course of your permit. Import Management will notify you of any significant changes to the import health standard and will re-issue the permit to accommodate these changes.

IMPORTANT INFORMATION FOR PERMIT HOLDERS AND AGENTS

- 3 There are a number of other provisions in the Biosecurity Act 1993 which may affect you. If you commit an offence against the Biosecurity Act 1993, heavy penalties under section 157 of the Act might apply.
- 4 Apart from the Biosecurity Act 1993, there are other laws relating to or prohibiting the importation of goods. This permit, and compliance with the provisions of the specific import health standard(s) and/or entry conditions, does not absolve you of the need to comply with these laws.
- 5 Unless specifically identified in 'Description of Items' or 'Special Conditions' of the permit, NO new organisms, including genetically modified organisms, are permitted entry under this permit.
- 6 All cultures must be:
- clearly labelled with the scientific strain and name
 - consigned in leakproof packaging
 - free from contaminants
- 7 All new organisms must not be opened until received by the nominated containment facility.
