

Sarah Beanland Memorial Scholarship

Previous Recipients

This award is now made to one applicant each year for PhD study, and normally has a tenure of three years. Initially, from 1999 to 2005, it was awarded for either MSc or PhD study, and was granted only when the scholarship was vacated by the previous holder(s).

1999 Josie Robertson

from The University of Auckland for MSc research at The University of Auckland on: The Calypso Filed: A shallow submarine geothermal system in the Bay of Plenty, New Zealand.

1999 Nigel Hill

from Victoria University of Wellington for MSc research at Victoria University of Wellington on: Paleoseismicity of the eastern Awatere fault near Lake Jasper, Marlborough, New Zealand.

2000 Alexandra Johansen

from Victoria University of Wellington for PhD research at University of Waikato on: Facies analysis and hydrocarbon reservoir characteristics of Miocene sandstones, East Coast Basin, North Island, New Zealand.

2002 Kate Wilson

from Massey University for PhD research at Victoria University of Wellington on: Neotectonics, structure, and uplift of the Hikurangi margin, New Zealand.

2005 Alex Winter-Billington

from Victoria University of Wellington for MSc research at Victoria University of Wellington on: The hydrological system and surface motion of Brewster Glacier, Mt Aspiring National Park, South Island, New Zealand.

2005 Elizabeth Robinson

from Victoria University of Wellington for MSc research at Victoria University of Wellington on: Centroid Moment Tensor Inversions from GeoNet data to provide a local MW scale for New Zealand.

2006 Rosemary Cody

from University of Nebraska – Lincoln (USA) for PhD research at Victoria University of Wellington on: An integrated study of paleo-environmental evolution of major ocean/climate systems in the southwestern Pacific.

2007 Amandine Chambord

from Université de Bretagne Occidentale (France) for PhD research at Victoria University of Wellington on: Tectonic reconstruction of New Zealand, Antarctica, and Australia since Late Cretaceous time.

2008 Hannu Seebeck

from Victoria University of Wellington for PhD research at University of Canterbury on: Relations between faulting, volcanism and fluid flow in the Taupo Rift, New Zealand.
