## Acknowledgements

The New Zealand Science, Mathematics and Technology Teacher Fellowship Scheme is funded by the New Zealand Government and administered by the Royal Society of New Zealand. A key objective of this Royal Society of New Zealand Teacher Fellowship was to 'create resources that enable primary school teachers, with limited science knowledge, to teach this topic confidently and with minimal preparation'. This resource would not have been possible without the support, knowledge and skills of GNS Science and Royal Society staff.

Particular thanks for their encouragement, advice and editing are extended to Julian Thomson, Brad Scott, Gill Jolly, Kitty Higbee, Zoë Juniper and the numerous other GNS staff who have

willingly and generously shared their knowledge. Thanks also to Room 14 at [Silverstream School](#) who were willing volunteers for trial lessons and enthusiastic volcano creators. Alison Pullar - December 2009
